(54) Title: DISPLAY SYSTEM INCORPORATING AN ELECTRO-MECHANICAL WAVE TRANSDUCER

(57) Abstract: A display system (20) employs a light source (21), a display panel (31), and an optical filter (23). An optical path (OP) extends from the light source (21) through the optical filter (23) to the display panel (31) where light emitted from the light source (21) propagates along the optical path (OP) through the optical filter (23) to the display panel (31). The display system (20) further employs an Nth order electro-mechanical wave transducer (24, 40) to vibrate the optical filter (23) to thereby facilitate a desired illumination of the emitted light onto the display panel (31).
